

NovaSensor Introduces the NEW NPA 201 Digital Barometric Pressure Sensor

St. Mary's PA USA – April 2015; Amphenol Advanced Sensors' NovaSensors product line is pleased to announce the new NPA 201 Digital Barometric Pressure Sensor.

The NovaSensor NPA 201 is an absolute pressure sensor with digital output for low cost applications.

Its low power consumption, high accuracy, and compact size makes it ideal for battery powered and mobile applications or any application where size is a constraint. In today's growing market for portable electronics and wearables with multiple parameters being measured there are many applications that require an accurate measurement of barometric pressure to determine factors such as altitude, and the NPA-201 makes this possible in a compact, cost-effective way.

About Amphenol Advanced Sensors:

Amphenol Advanced Sensors is a leading innovator in advanced sensing technologies and innovative embedded measurement solutions customized for regulatory and industry driven applications, creating value by providing critical information for real time data decisions.

Amphenol Advanced Sensors is a company of leading industry brands as Telaire, Kaye, **Thermometrics**, Modus Instruments, NovaSensor, and Protimeter are industry leaders over 70 years.

Amphenol Advanced Sensors offers industry leading domain expertise, rapid customization, world-class manufacturing capability and lasting customer relationships to deliver the greatest value in cost of ownership to their customers.
